## PROFILE

I am a designer located in Cleveland, Ohio. Currently, I work as a web designer for a software company but I am involved with creative projects on the side. My design interests and skills center around web, animation and print. Feel free to contact me if you wish to discuss a potential project or if you have any questions.

## EXPERIENCE

### ***Web Designer, Thumbprint, Ltd., Solon, OH 2007 - Present***

Thumbprint is the software provider for ECRM, a company that manages trade shows. My job involves working on prints, web designs, web application prototypes, animations, video filming/editing and some sound editing. My presence at Thumbprint opened the door to more Adobe Flash projects which has enhanced ECRM's web site and other projects.

### ***Freelance Flash Designer, Digt Audio, New York, NY 2008 - 2009***

Digt Audio is a post audio production company for independent films in New York. Their Flash site needed to be updated so I worked with them to make the site bigger to fit modern browsers, update photos, information, etc. I also added functionality to allow the credits and portfolio information to be updated through an XML sheet.

### ***Animator, Soul Of Athens Project, Athens, OH 2007***

My senior year, VisCom created an interactive site based on this idea of the "soul" of Athens, which is the town the college is located. I animated a teaser, animated a closing logo for the DVD and added interactivity for an info graphic.

### ***Intern, Cinecraft, Cleveland, OH 2006***

I held a summer graphics intern position at Cinecraft. There I worked on small projects like fixing errors on their web site, cropping images for video, and so on. My biggest project was working on a Delta Faucets mind map for a workers convention.

## EDUCATION

Ohio University, Athens, OH 2007
